

Information for English speaking rowing teams

Welcome to Niffer – Base trinationale d'aviron

The rowing area on the Canal Rhône-Rhine is located in a natural environment of the RAMSAR zone Rhine.

Please respect this environment. Do not leave waste! Use our bin!

The rowing zone is 17km long. Turn before entering the port of Mulhouse.
From the pontoon the teams row on the bow side.

Ships always have priority.

Pay attention when approaching the lock's zone.

Do not enter in this zone with the boats.

Pay attention on **anglers** on both sides of the canal.

The lawn surrounding the boat house (hangar) is reserved for guest boats.

Do not store boats on the way running alongside the canal.

There are **toilets** on the south side of the football clubhouse.

The key for the toilets is inside the hangar. Before leaving the rowing zone, please lock the toilet's doors.

The code of the boat house padlock is actually **1664**. It's the same for the padlock on the fence surrounding the pontoon.

Before leaving the rowing zone, please lock all padlocks.

If you use our **motorboats**, you have to get them out of the boathouse and put them away in the boathouse after your rowing session. Do not leave the boats in water when you leave the place. Pay attention at the motors. **Use gasoil only!**

All equipment you find in the boathouse has to be cleared away before leaving our place.

Please use the board book to point out broken things.

We hope you to have a pleasant rowing time in Niffer!

UNION REGIO AVIRON

The president

Jean-François VALLOIS
